

ODCA / DMTF Work Register
Version 2.0
Date Initiated : August 30, 2012

Alliance Organizations

[Open Data Center Alliance](#) and the [Distributed Management Task Force](#) (DMTF)

Background

The Open Data Center Alliance was formed in 2010 as a unique consortium of leading global IT organizations. They are led by a steering committee of senior IT executives from BMW, China Life, China Unicom, Deutsche Bank, JPMorgan Chase, Lockheed Martin, Marriott International, Inc., National Australia Bank, Terremark, Disney Technology Solutions and Services, and UBS. Intel Corporation serves as the organization's technical advisor. They came together to deliver a unified voice for emerging data center and cloud computing requirements.

Alliance Partner Mission

Their mission is to speed the migration to cloud computing by enabling the solution and service ecosystem to address IT requirements with the highest level of interoperability and standards. This includes:

- Identifying customer requirements for corporate adoption and deployment of cloud computing
- Defining usage models for these requirements based on open, industry-standard, multi-vendor solutions that support a vision of secure federation, automation, common management, and transparency
- Influencing industry innovation with:
 - o Collective membership commitment to use Alliance usage models to guide corporate planning and purchasing of data center resources
 - o Solution Provider member commitment to prioritize solution delivery based on Alliance Usage Model requirements
- Collaborating with industry standards bodies to define standards development aligned with Alliance priorities.

Alliance Benefits

The ODCA develops customer driven usage models and requirements – these requirements are intended to create an ecosystem of open, interchangeable and interoperable solutions and components. Key pre-requisites for this are standards that are widely adopted and allow for wide interoperability. The DMTF is a globally recognized body that develops the technology specifications for enterprise and cloud management. It will, therefore, be good for the two organizations to be able to coordinate requirements and customer driven usage models and ensure that the standards developed comprehend customer needs. This is a win-win for the entire ecosystem since technology/solution vendors who develop to these end-user qualified standards know that there is a ready market of customers and the customers then have a range of solutions to choose in order to meet performance and cost efficiency.

Standards Development

The DMTF and ODCA seek to collaborate on requirements and the development of key standards to the interoperable management of IT enterprise and of cloud environments. Both organizations currently plan to adopt appropriate existing standards and assist and support recognized bodies developing new standards relevant to cloud computing. Therefore an alliance between our organizations would help ensure alignment in the industry.

Milestones / Dates

Work Items, Deliverables and Milestones	Timeline/Linkages
<p>I. Review of Open Data Center Alliance Work by the DMTF:</p> <ol style="list-style-type: none"> 1. The ODCA will invite the DMTF to review usage and requirement document in progress - post 60% completion and ODCA internal review. The DMTF will provide guidance on level of actionable detail, completeness of requirements and clarity of requirements. In addition, the DMTF will educate the ODCA on standards (relevant to the requirements) that have been developed or are in development 	<p>Cycle 2 Usages: Q312</p> <p>ODCA's claaS MUM</p>
<p>II. Close collaboration on ODCA Licensing Usage Model and DMTF Software License Management Standards (this is a new workgroup being formed Q312)</p> <ol style="list-style-type: none"> 1. ODCA define requirements and review standards work products 2. Joint definition sessions with appropriate WGs or designated teams 3. ODCA to provide input to requirements into proposed Software License Management Work Group Priorities and deliverables 	<p>TBD in Q412</p> <p>DMTF's Software License WG and ODCA Licensing UM</p>
<p>III. Collaboration on extension to OVF 2.0 currently published as a Work-in-Progress to support "VM interoperability" usage model requirements</p>	<p>early Q412</p> <p>DMTF's OVF 2.0 and ODCA's Long Range Migration</p>
<p>IV. Collaboration on Cloud Management Standards:</p> <ol style="list-style-type: none"> 1. ODCA to review and provide input to DMTF Cloud Infrastructure Management Interface specifications currently published as Work-in-Progress for version post 1.0 	<p>Q412</p> <p>DMTF Cloud Infrastructure Mgmt and ODCA claaS</p>

The ODCA will review and provide feedback to DMTF WIP documents via the DMTF feedback portal process. The DMTF will review and provide feedback to ODCA WIP documents as per the Proprietary Notice that appears in ODCA documents.

Work Register Review Date

The DMTF and the ODCA will review the work register at least every six months to update progress and make sure the milestones reflect current objectives and priorities.
