14 DMTF is a not-for-profit association of industry members dedicated to promoting enterprise and systems
15 management and interoperability. Members and non-members may reproduce DMTF specifications and
16 documents, provided that correct attribution is given. As DMTF specifications may be revised from time to
17 time, the particular version and release date should always be noted.

18 Implementation of certain elements of this standard or proposed standard may be subject to third party
19 patent rights, including provisional patent rights (herein "patent rights"). DMTF makes no representations
20 to users of the standard as to the existence of such rights, and is not responsible to recognize, disclose,
21 or identify any or all such third party patent right, owners or claimants, nor for any incomplete or
22 inaccurate identification or disclosure of such rights, owners or claimants. DMTF shall have no liability to
23 any party, in any manner or circumstance, under any legal theory whatsoever, for failure to recognize,
24 disclose, or identify any such third party patent rights, or for such party's reliance on the standard or
25 incorporation thereof in its product, protocols or testing procedures. DMTF shall have no liability to any
26 party implementing such standard, whether such implementation is foreseeable or not, nor to any patent
27 owner or claimant, and shall have no liability or responsibility for costs or losses incurred if a standard is
28 withdrawn or modified after publication, and shall be indemnified and held harmless by any party
29 implementing the standard from any and all claims of infringement by a patent owner for such
30 implementations.

31 For information about patents held by third parties which have notified the DMTF that, in their opinion,
32 such patent may relate to or impact implementations of DMTF standards, visit

126

Introduction

127 This document defines the process governing DMTF bodies (Committees, Working Groups, Forums, and
128 Chapters) and documents. It is targeted to all DMTF members as a framework to facilitate the work of the
129 DMTF.

130 This document does not define the process for all DMTF bodies and activities. Please refer to the DMTF
131 Policies page at <http://dmf.org/about/policies> for a complete list.

132 The defined processes outlined in this document include:

- 133 • Body and sub-Body formation, structure, chartering, quiescing and dissolution
- 134 • Body membership and participation
- 135 • Meeting requirements and guidelines
- 136 • Chair, co-chair and vice-chair models and selection
- 137 • Voting and Ballots
- 138 • Supporting organizational processes
- 139 • Common rules and procedures
- 140 • DMTF document release process, comment resolutions and change requests
- 141 • DMTF management initiatives
- 142 • Information access
- 143 • Approval processes

144 The Executive Committee prepared the *DMTF Process for Working Bodies* (DSP4014).

145 DMTF is a not-for-profit association of industry members dedicated to promoting enterprise and systems
146 management and interoperability. For information about the DMTF, see <http://www.dmf.org>.

147

DMTF Process for Working Bodies

148 1 Scope

149 This document defines DMTF processes governing the formation, structure, and activities of DMTF
150 Bodies and the DMTF Release Process for DMTF documents, including:

- 151 • Documents that are intended to become DMTF Standard Documents
- 152 • Documents that are intended to become DMTF Informational Documents
- 153 • Schemas
- 154 • Source code

155 2 Normative references

156 The following documents, in whole or in part, are normatively referenced in this document and are
157 indispensable for its application. For dated references, only the edition cited applies. For undated
158 references, the latest edition of the referenced document (including any amendments) applies.

159 Policies that may be found on <http://dmf.org/about/policies>:

- 160 • DMTF Bylaws
- 161 • DMTF Patent and Technology Policy
- 162 • DMTF DSP4003 – DMTF Alliance Partnership Process
- 163 • DMTF DSP4010 – DMTF Financial Process and Procedures

164 Charter Template

165 Document Request Template (DR)

166 ISO/IEC Directives Part 2 – Rules for the structure and drafting of International Standards
167 <https://isotc.iso.org/livelink/livelink.exe?func=ll&objId=4230456&objAction=browse&sort=subtype>

168 ISO 639-1:2002 – Codes for the representation of names of languages – Part 1 Alpha-2 code

169 3 Terms and definitions

170 In this document, some terms have a specific meaning beyond the normal English meaning. Those terms
171 are defined in this clause.

172 The terms "shall" ("required"), "shall not," "should" ("recommended"), "should not" ("not recommended"),
173 "may," "need not" ("not required"), "can" and "cannot" in this document are to be interpreted as described
174 in [ISO/IEC Directives, Part 2](#), Clause 7. The terms in parentheses are alternatives for the preceding term,
175 for use in exceptional cases when the preceding term cannot be used for linguistic reasons. Note that
176 [ISO/IEC Directives, Part 2](#), Clause 7, specifies additional alternatives. Occurrences of such additional
177 alternatives shall be interpreted in their normal English meaning.

- 178 **3.1**
179 **Alternate Voter**
180 any person eligible to vote in a particular Body who is not identified in the roster of that Body as the
181 Primary Voter
- 182 **3.2**
183 **Ballot**
184 a vote by any means
- 185 **3.3**
186 **Board of Directors**
187 **Board**
188 a group of persons, as defined in the [DMTF Bylaws](#), chosen to govern the affairs of the corporation
- 189 **3.4**
190 **Body**
191 a substitution for Committee, Forum, Chapter, or Working Group
- 192 **3.5**
193 **DMTF Artifact**
194 any published material released by the DMTF
- 195 **3.6**
196 **DSP Identifier**
197 an identifier assigned to most DMTF documents
- 198 **3.7**
199 **DMTF Standard**
200 a DMTF document of a normative nature that addresses a specific problem domain and has been
201 released by the DMTF
- 202 **3.8**
203 [Document Request](#)
204 **DR**
205 the template that obtains, take ownership of, or returns DSP identifiers
- 206 **3.9**
207 **Editing Body**
208 the Committee or Working Group assigned editorial responsibility for any given document
- 209 **3.10**
210 **Electronic Ballot**
211 a Ballot conducted electronically following the procedures defined herein
- 212 **3.11**
213 **IP Solicitation**
214 a notification to membership, consistent with the DMTF Patent Policy that solicits response of essential
215 patent claims that relate to the subject document
- 216 **3.12**
217 **Parent Body**
218 DMTF Body immediately above the current body in the hierarchy of DMTF Bodies

219 **3.13**

220 **Primary Voter**

221 the person eligible to vote in a Body that has been identified in the roster of that Body as the primary voter

222 Note 1 to entry: There may only be one Primary Voter representing any Member. A Member may elect to identify
223 different persons as the Primary Voter in each Body in which it may vote.

224 **3.14**

225 **Process Document**

226 any document produced by the DMTF that defines the policies and procedures that apply to the DMTF

227 **4 Symbols and abbreviated terms**

228 The following abbreviations are used in this document.

229 **4.1**

230 **DMTF**

231 Distributed Management Task Force

232 **DR**

233 Document Request

234 **5 DMTF Committees, Working Groups, Forums, and Chapters**

235 **5.1 Structure and introduction**

236 Bodies in the DMTF are arranged in a hierarchical structure rooted at the Board. Bodies reporting to the
 237 Board are called Committees and operate as Other Committees in accordance with the [DMTF Bylaws](#).
 238 Working Groups and Chapters report to Committees. Forums may report to any Body. The Body to which
 239 a Body reports is referred to as its Parent Body.

240 Every Body has a Board-approved charter that defines its scope.

241 Procedures common to all Bodies are described in clause 5.8 and apply unless more specific guidance is
 242 provided in this clause.

243 **5.2 Membership levels, roles, voting, and participation**

244 As determined by Board resolution and documented herein, membership is divided into various levels
 245 that determine permissible roles, participation and voting rights within Bodies, as Table 1 lists. Additional
 246 requirements may be documented in a specific Body’s Rules of Procedure.

247 **Table 1 – Membership levels**

Role or right	Leadership	Participation	Designated Alliance-Partner Representative	Academic Alliance-Partner Representative
Chair Committees	Yes	No	No	No
Vote in Committees	Yes	No	No	No
Participate in Committees	Yes	No	No	No
Chair Work Groups	Yes	No	No	No
Vote in Work Groups	Yes	Yes	No	No
Participate in Work Groups	Yes	Yes	May ¹	May ¹
Serve as a Forum Officer	Yes	No	No	No
Vote in Forums	Yes	Yes	No	No
Participate in Forums	Yes	Yes	May ¹	May ¹
Vote in Chapters	Yes	Yes	No	No
Participate in Chapters	Yes	Yes	No	No

¹ Fellow, Expert, Alliance Partner and Academic Alliance Partner level members may apply to participate in specific Working Groups or Forums in their application. The Board establishes specific participation at the time of approval.

Role or right	Leadership	Participation	Designated Alliance-Partner Representative	Academic Alliance-Partner Representative
Observe	Yes	Yes	May ²	May ²

248 Member representatives are eligible for the role or right in any particular Body provided that the Member
 249 is of a suitable membership level, meets the requirements of a Body's Rules of Procedure, if any, and the
 250 representative has been admitted to the membership roll of that Body.

251 DMTF Fellows may act in any role in any Body as designated by the Board.

252 DMTF expects as much continuity in representation as possible.

253 Members are encouraged to participate in any and all Bodies where they can actively contribute.

254 **5.3 Committees**

255 The Board of Directors is responsible for the creation and termination of Committees. Committees focus
 256 on specific aspects of the work and mission of the DMTF and are responsible for the development of
 257 DMTF marketing programs, technologies, and initiatives.

258 **5.3.1 Committee chair**

259 Committee chairs are appointed by the Board of Directors.

260 **5.3.1.1 Committee vice-chair**

261 All Committees must have a vice-chair. It is the vice-chair's responsibility to serve in the place of the chair
 262 should the chair be temporarily unable to fulfill the duties and responsibilities required of the chair.
 263 Committee vice-chairs are elected by the Committee according to the process in clause 5.8.2, with the
 264 clarification that both the Parent Body and the Body referenced in that clause are the Committee (thus the
 265 Board of Directors is not directly involved). The vice-chair must be a voting participant of the committee
 266 prior to the election.

267 **5.4 Working Groups**

268 Committees form Working Groups, consistent with the Committee's charter.

269 To exist, a Working Group must have current unfulfilled goals and a charter. A Working Group can be
 270 considered active regardless of whether scheduled teleconferences occur or change requests are
 271 submitted.

272 **5.4.1 Working Group chair**

273 Eligible Member representatives may chair a Working Group.

- 274 1) The Working Group chair is a member of the parent Committee, but may not vote unless
 275 otherwise eligible. A person may chair or co-chair more than one Working Group.
- 276 2) Working Groups that do not have co-chairs are encouraged to have vice-chairs. If a Working
 277 Group has a vice-chair, it is the vice-chair's responsibility to serve in the place of the chair
 278 should the chair be temporarily unable to fulfill the duties and responsibilities required of the
 279 chair. There are no restrictions on the number of Working Groups that a person may vice-chair.

² Observer roles may exist only if permitted by the Body's Rules of Procedure

- 280 3) Subsequent elections for a Working Group chair follow the process defined in clause 5.8.2.
- 281 4) In the unlikely event that a Working Group chair is unable to fulfill the responsibilities of the
- 282 position and has not resigned, Working Group participants from three separate Leadership
- 283 Members may submit a request to the parent Committee that a new election be held. The
- 284 request must be submitted in writing, either via email or hard copy. The request is then voted in
- 285 the parent Committee. Prior to initiating the request, Working Group members are strongly
- 286 encouraged to attempt to resolve their concerns directly with the Working Group chair.

287 5.5 Forums

288 A Body may create Forums. Forums focus on issues in specific areas of the Body's charter. Forums are

289 different from Working Groups in that Forums pursue work that is interesting to a subset of DMTF

290 members and may collect and disperse monies, within the rules and regulations of the [DMTF Bylaws](#),

291 from this subset of the DMTF membership to succeed at their stated mission. As such, membership in a

292 Forum may be restricted to DMTF members who fulfill key requirements like paying special dues or a

293 Forum membership fee. Forums may exist for any purpose within these guidelines and the [DMTF Bylaws](#).

294 Forums are intended to be self-funding (that is, they are responsible for collecting monies to pay for

295 programs or initiatives they seek to deliver), but may request funds from their Parent Body.

296 Forums may still be considered active regardless of whether scheduled teleconferences occur or change

297 requests are submitted. It is necessary that Forums have current unfulfilled goals and charters to exist.

298 5.5.1 Forum officers

299 Forums may establish the cadre of officer positions needed to govern; however, each Forum must at

300 least have a chair. Officer positions may include but are not limited to chair, vice-chair, treasurer, or

301 secretary. Leadership Members who pay applicable Forum dues are eligible to be an officer in a Forum.

302 No other categories of membership have the right to be an officer in a Forum. The Forum chair is a

303 member of the sponsoring Committee, but may not vote unless otherwise eligible. The chair is

304 responsible for leading other officers that are elected to the Forum. Officers in a Forum should be elected

305 every two years. In the event that an officer in a Forum resigns or can no longer fulfill the obligations of

306 the office, a new officer is selected according to the process defined in clause 5.8.2.

307 5.5.2 Collection of membership dues and fees; accounting services

308 Collection of dues and fees, banking services, and other accounting services are provided to the Forum

309 from DMTF central services. All Forum memberships will align with the membership cycle of the DMTF

310 and fiscal year, and follow the established practices of the DMTF.

311 5.5.3 Technical specifications and standards

312 The Technical Committee shall ultimately govern and manage all standards or specifications that a Forum

313 may require.

314 5.5.4 Marketing and PR activities

315 Marketing and PR needed to carry out the Forum's objectives are supplied to the Forum through the

316 DMTF Marketing Task Force.

317 5.6 Chapters

318 The Executive Committee forms Chapters. Chapters are coordinated through the Regional Chapter Task

319 Force. Chapters focus on issues of concern to specific geographic regions. Membership in a Chapter may

320 be restricted to DMTF members who fulfill key requirements such as paying special dues or a

321 membership fee as defined in the chapter's Rules of Procedure.

322 Chapters are intended to be self-funding (that is, they are responsible for collecting monies to pay for
323 programs or initiatives they seek to deliver), however they may request funds from their governing
324 Committee.

325 **5.6.1 Chapter officers**

326 Chapters may establish the cadre of officer positions needed to govern; however, each Chapter must at
327 least have a chair. Officer positions may include but are not limited to chair, vice-chair, treasurer, or
328 secretary. Leadership Members who pay applicable Chapter dues are eligible to be an officer in a
329 Chapter. A Member may hold only one officer position in any given Chapter. No other categories of
330 membership have the right to be an officer in a Chapter. The Chapter chair is a member of the sponsoring
331 Committee, but may not vote unless otherwise eligible. The chair is responsible for leading other officers
332 that are elected to the Chapter. Officers in a Chapter should be elected every two years. In the event that
333 an officer in a Chapter resigns or can no longer fulfill the obligations of the office, a new officer is selected
334 according to the process defined in clause 5.8.2.

335 **5.6.2 Collecting membership dues and fees; accounting services**

336 Collection of dues and fees, banking services, and accounting services are provided to the Chapter from
337 DMTF central services. All Chapter memberships will align with the membership cycle of the DMTF and
338 fiscal year, and follow the established practices of the DMTF.

339 **5.6.3 Technical specifications or standards**

340 The Technical Committee shall ultimately govern, manage, and approve all standards or specifications
341 that a Chapter may require.

342 **5.6.4 Marketing and PR activities**

343 Marketing and PR needed to carry out the Charter's objectives will be developed in coordination with the
344 DMTF Marketing Task Force.

345 **5.7 Task Force**

346 A Task Force may be created by any Body for the purpose of producing any document or proposal to its
347 Parent Body or to perform any work, as directed by the Parent Body.

348 A Task Force may consist of one or more individuals appointed by the Parent Body; however, they do not
349 need to be members of the Parent Body. By default, the members of a Task Force are members of the
350 Parent Body and any participation in the Task Force by members who are not members Parent Body
351 shall be included deliberately by an approved motion.

352 Task Forces are led by a person appointed by the Parent Body, or may be elected from amongst the
353 Taskforce membership.

354 Task Forces have no minimum quorum rules and generally shall operate on a consensus basis. Votes, if
355 required during Task Force issue resolution, require only a simple majority to pass.

356 Task Forces have no standing other than to generate proposals for presentation to their Parent Body.

357 Task Forces may be disbanded at the discretion of the Parent Body.

358 Task Force formation is recorded in the minutes of its Parent Body along with the intended scope and
359 membership rules.

360 Task Force scope must be contained within the scope of its Parent Body.

361 Operation of a Task Force in all other ways operates the same as any other Body with regard to agenda
362 and minutes and other procedures.

363 **5.8 Common rules and procedures**

364 This clause contains information supporting the prior clauses.

365 **5.8.1 Body formation**

366 This clause covers the formation of bodies such as Working Groups and Forums, referred to in this clause
367 as Body.

- 368 5) Proposals for a new Body can be proposed by any three Leadership Members of the DMTF.
369 They are brought to the chair of the appropriate Parent Body. A proposal to form the new Body
370 must be submitted and an interim chair or co-chairs identified (hereafter referred to as "interim
371 chair"). The interim chair must be a Leadership Member representative. The Parent Body chair
372 then hosts a discussion with the interim Body chair(s) and the appropriate Parent Body. The
373 goals of the discussion are to determine whether the work aligns with the strategy and focus of
374 the DMTF; what existing work is available in the industry; whether cooperative relationships with
375 standards outside the DMTF might be necessary; and so on. No binding vote need be held. The
376 proposal goes to the Board for approval.
- 377 6) After the proposal for the new Body is approved by the Board, an announcement is sent to all
378 Leadership Members by the Committee chair soliciting interested participants to attend one or
379 more formation meetings or teleconferences. The purpose of these meetings is to craft an initial
380 charter for the Body (see charter content 5.8.7.1), goals, deliverables, timeline, and Rules of
381 Procedure (see Rules of Procedure 5.8.10), if applicable. An interim group page is created on
382 the DMTF web site to facilitate discussion and coordinate meetings. At least three Leadership
383 Members must express interest to continue to the next step.
- 384 7) The chair of the appropriate Parent Body is responsible for providing insight and observations
385 about the DMTF, any requested help in anticipating Committee and Board questions and
386 responses, and answers to procedural questions.
- 387 8) At the conclusion of the meetings, the interim chair submits the proposed initial charter and
388 Rules of Procedure, if applicable, to the chair of the appropriate Parent Body along with
389 proposed goals and an initial timeline. In addition, the interim chair must identify at least three
390 Leadership Members that remain committed to the ongoing work. The Parent Body chair then
391 verifies the submitted information. If no issues exist, the charter and list of committed
392 Leadership Members are sent to the Parent Body for Ballot following the normal Ballot process.
393 The charter and Rules of Procedure go to the Board for approval. Issues with the Body's
394 proposed charter, Rules of Procedure and list of committed members should be raised in the
395 initial Ballot and then worked to closure.
- 396 9) After Board approval of the Body's initial charter and Rules of Procedure, the appropriate
397 Committee chair sends a second announcement to all DMTF members indicating the formation
398 of the new Body and the timing of its first meeting. At the formation meeting for the Body, the
399 charter and list of committed members are reviewed (and possibly amended); the chairing
400 method for the Body is decided (single chair, chair and vice chair, or co-chairs); the official chair
401 nomination process is started; and work on the deliverables commences. Meeting times for the
402 new Body should also be discussed and balloted if agreement during the meeting is not
403 reached.
- 404 10) At the Body's first meeting, any chairs, vice-chairs, co-chairs or other officers are elected
405 according to the procedure in clause 5.8.2.

406 **5.8.2 Quiescing and reactivating a Body, de-chartering**

407 **5.8.2.1 Quiescing**

408 Should a Body become inactive for a period of time or plan to become inactive, the Body may be
409 quiesced as follows:

- 410 • The Body's chair may make a request to its Parent Committee's chair that the Body be
411 quiesced. A motion is made to quiesce the Body at the parent Committee and a vote is held.
412 Upon parent Committee approval, the request is forwarded to the Board for approval.
- 413 • After Board approval, an announcement is sent to all the DMTF members indicating that the
414 Body is quiesced and the web location of its archived information. Questions regarding the work
415 and deliverables of the Body can continue to be mailed to the DMTF list through the [Contact](#)
416 page.
- 417 • If the Body has funds under its management, such as potentially Chapters or Forums, those
418 accounts shall be settled and any excess shall be returned to the DMTF general fund. No
419 reserve shall be carried forward.

420 **5.8.2.2 Reactivating**

421 Bodies that have been quiesced may be reactivated as follows:

- 422 • The Body's former chair, or a former member if no chair is available, and a minimum of three
423 additional members shall make a request to reactivate to its Parent Committee.
- 424 • The Parent Committee shall vote. Upon an affirmative vote, the request will be passed to the
425 Board for approval.
- 426 • After Board approval, an announcement is sent to all the DMTF members indicating that the
427 Body has been reactivated and the web location of its archived information.

428 **5.8.2.3 De-chartering**

429 Any Body that has been inactive for a period of three years shall be de-chartered by an affirmative vote of
430 the Board at any meeting subsequent to the three-year anniversary of inactivity or at the Board's
431 discretion. It is not necessary that the Body be quiesced at the time of de-chartering.

432 Previously created and archived materials remain as part of the permanent record; however, for the Body
433 to become reactivated, a new charter must be created that specifies the continuation of the work of the
434 previously de-chartered Body.

435 **5.8.3 Chair and officer elections**

436 The following clause applies to the selection of chairs, co-chairs, vice-chairs and other officers. No
437 Member may hold more than one chair or officer position in a particular Body.

438 **5.8.3.1 Electing Officer**

439 The Electing Officer shall be the Parent Committee's presiding officer for chair, vice-chair, and co-chair
440 elections. The Electing Officer for other officers shall be the Body's presiding officer.

441 **5.8.3.2 Order of Elections**

442 If the Body's chairing model is single chair or chair and vice-chair, then the election for chair shall occur
443 before any other election. If the Body's chairing model is co-chair, then the co-chair election shall occur
444 before any other election.

445 5.8.3.3 Election Procedure

- 446 • The Electing Officer announces by email to the Body's mailing list that nominations for the
447 vacant position(s) are being solicited. Nominations can be submitted at a meeting or by email to
448 the Electing Officer's alias. Nominations shall be open for a minimum of five business days after
449 announcement to the Body's email list.
- 450 • At the meeting following the close of the nomination period, the Electing Officer announces the
451 list of candidates nominated for each vacancy. Candidates may describe their background and
452 interest in the role. If multiple nominees for a vacancy exist, the winning candidate is selected
453 through an email Ballot to the Electing Officer's alias. Each Member may vote once for each
454 vacancy on the Ballot, provided that each vote is for different persons.
- 455 • If only one candidate exists for a vacancy, a default selection is made and announced.
456 Members may voice objections to the default selection by email to the Electing Officer's alias
457 within five business days of the announcement. Should an objection be received, an attempt
458 shall be made to resolve it. If resolution is not possible, then an election shall be held after
459 another five business-day call for nominations. Such election shall be held even though only
460 one candidate stands. A simple majority of the votes is sufficient to elect the candidate.
- 461 • If multiple candidates exist for a vacancy, then the candidate with a simple majority of the votes
462 is selected. If no candidate has obtained a simple majority, then there shall be a run-off election
463 between the two candidates with the most votes. The Electing Officer at the conclusion of each
464 round of voting shall disclose the total number of votes cast for each vacancy as well as the
465 number of votes achieved by each candidate.
- 466 • In the case of the simultaneous election of two co-chairs, each Member shall have the
467 opportunity to cast two votes, each of which must be cast for different persons. Any candidate
468 that receives a number of votes greater than 50% of the number of Members that cast votes is
469 elected. If one position remains unfilled, then there shall be a run-off election between the
470 remaining two candidates that had received the most votes. Should there remain unfilled
471 positions, then each co-chair shall be voted sequentially and the candidate with a plurality of
472 votes shall be elected.

473 5.8.4 Chair responsibilities

474 This clause covers the responsibilities of a chair, vice-chair, or co-chair.

- 475 • The chair is responsible for acting as the presiding officer for all meetings and ensuring that all
476 DMTF policies and procedures are followed.
- 477 • The chair is responsible for attending meetings of the Body and providing reports to the Parent
478 Body.
- 479 • The chair is responsible for informing the Parent Body of the progress, schedule, and status of
480 the specific technologies or programs under development by the Body and its subordinate
481 bodies on a monthly basis.
- 482 • As goals, schedules, and deliverables change, the chair is responsible for providing that data for
483 publication on the Body's public web page by sending the request with all necessary information
484 through the approvals required of an Informative Document (6) and ultimately to
485 tc-support@dmf.org for publication.
- 486 • The chair is responsible for bringing Body issues to the Parent Body for resolution and Body
487 deliverables to the Parent Body for forwarding to the DMTF Board through the organization for
488 publication.
- 489 • The chair is responsible for maintaining email lists and rosters for the Body.
- 490 • The chair is responsible for ensuring that accurate minutes of each meeting are taken and
491 posted on the "Members Only" web site, together with pertinent documents.

- 492 If a Body chooses to rotate responsibility for recording minutes amongst its participants, each
493 such Member is required to join in the rotation.
- 494 • The chair is responsible for seeing that meeting attendance is tracked by using the tracking tool
495 in the Body's area of the web site.
 - 496 • The chair is responsible for ensuring that an accurate record of the status of all specifications
497 owned by the Body is maintained.
 - 498 • The chair is responsible for ensuring the Body and all subordinate Bodies are operating within
499 their charters and those charters are up to date.
 - 500 • The chair is responsible for publishing the agenda 72 hours prior to meetings and ensuring that
501 all collateral material for discussions is published 72 hours prior to meetings.
 - 502 • Collateral material, for the purposes of this document, includes any material that is the
503 subject of discussion, the subject of an electronic ballot or voice vote or any other
504 document, presentation or deliverable that is not considered feedback on any such ballot
505 or vote.
 - 506 • The chair is responsible for declaration of voting results.
 - 507 • The chair is responsible for Alliance Partner Work Register ([DSP4003](#)) responsibilities and
508 milestones as declared in the Work Registers.
 - 509 • The chair is responsible for ensuring adherence to the DMTF Recording Policy.
 - 510 • The chair is responsible for ensuring that the Body and all subordinate Bodies have a vice-chair
511 or co-chair that can assume the role of chair upon a vacancy or absence of the chair.
 - 512 • The chair is responsible for coordinating with the DMTF Marketing task force so that press
513 releases or other distribution of information related to those documents produced by the group
514 are properly targeted and issued in a timely manner.
 - 515 • The chair shall ensure that an appropriate Body representative capable of knowledgably
516 addressing issues or questions attend the meeting of a Parent Body that is considering an
517 action or Ballot on behalf of the Body.

518 **5.8.5 Chair vacancy**

519 From time to time, events may result in the temporary absence of the chair, co-chair and/or vice-chair(s)
520 of a DMTF Body. In this event, the chair of the Parent Body(s) may act in their stead. Additionally, the
521 DMTF President may fill in temporarily in the absence of all of the Parent Body chairs, co-chairs and vice-
522 chairs or in the temporary absence of any Vice Presidents and their designated alternates.

523 From time to time, events may result in the necessity for the chair, co-chair or vice-chair of a DMTF Body
524 to vacate permanently. The following clause indicates circumstances when chair changes are warranted
525 and how they should be managed:

- 526 1) When the chair, co-chair or vice-chair leaves or changes their relationship with the Leadership
527 Member that they represent (other than through a merger or buyout), the position held by that
528 person must be vacated and a new election held; or in the case of a Committee, a new Board
529 appointment is made.
- 530 2) When a Body changes chairing model, the rules in clause 5.8.6 require that an election be held.
- 531 3) When a Leadership Member is purchased by, or merged with, another Leadership Member and
532 the co-chairs or the chair and vice-chair now represent the same Leadership Member, one of
533 the positions must be vacated and a new election held for that position; or in the case of a
534 Committee, a new Board appointment is made.

- 535 4) If no vice-chair or co-chair has been elected at the time of the vacancy, the chair of the Parent
536 Body assumes the responsibility until a new election can be completed; or in the case of a
537 Committee, a new Board appointment is made.

538 5.8.6 Chairing model changes

539 Should a DMTF Body deem it necessary to change its chairing model (which can be done any time by
540 motion in the DMTF Body), the following procedures shall be followed:

- 541 • When a single-chair Body changes to a model with a chair and a vice-chair, the current chair
542 maintains the position and an election is held for vice-chair.
- 543 • When a single-chair Body changes to a model with co-chairs, the current chair maintains the
544 position and an election is held for the other co-chair.
- 545 • When a Body with a chair and vice-chair changes to a model with a single chair, the current
546 chair maintains the position and the vice-chair position is eliminated.
- 547 • When a Body with a chair and vice-chair changes to a model with co-chairs, the current chair
548 maintains the positions, the vice-chair position is eliminated and an election is held for the other
549 chair.
- 550 • When a Body with co-chairs changes to a model with a single chair, the process is more
551 complex. If one chair resigns, the other chair maintains the position. Otherwise, the chairs
552 become interim chairs until an election is held for the single chair seat.
- 553 • When a Body with co-chairs changes to a model with a chair and vice-chair, the process is
554 more complex. If one chair resigns, the other chair maintains the position. Otherwise, the chairs
555 become interim chairs until an election is held for the single chair seat. The vice-chair position is
556 then filled through the normal election process.

557 5.8.7 Charters

558 All Bodies must have a Board-approved charter that defines the scope of work to be performed by the
559 Body. Charter format shall be according to that defined in the [Charter Template](#).

560 5.8.7.1 Charter content

561 Charter scope includes the following:

- 562 • Purpose, technology area, problems to be solved, and anticipated work to be performed.
- 563 • General nature of anticipated deliverables such as specifications, test code, example source
564 code, schemas or other materials.
- 565 • Parent Body.
- 566 • Disambiguate the nature of the Body from any other DMTF Body.

567 Charter scope does not include the following:

- 568 • Specifically named deliverables
- 569 • Chairs
- 570 • Schedule or time-line

571 5.8.7.2 Initial charter creation

- 572 • Committee charters are set by the Board.
- 573 • The initial charters for other bodies are formed according to the initial charter procedures
574 described in Body formation (clause 5.8.1).

575 5.8.7.3 Charter modification

- 576 • Bodies wishing to change their charters may do so by preparing the proposed new charter and
577 then obtaining Board approval (clause 6).

578 5.8.8 Meeting notices, agenda, and materials

579 Meeting notices shall be posted on the DMTF event calendar. Meeting agenda should be included in the
580 DMTF event calendar and must be sent to the Body's email list at least 72 hours the meeting. Collateral
581 material, or the material that is the subject of discussion, shall be posted at least 72 hours prior to the
582 start of the meeting. Bodies may decide on the frequency and nature (teleconference or face-to-face) of
583 their meetings.

584 5.8.9 Rules of Order

585 DMTF Bodies shall operate according to the rules contained in the current edition of Robert's Rules of
586 Order Newly Revised (RONR) unless those rules are inconsistent with the [DMTF Bylaws](#) or any rules or
587 processes that are defined in this document.

588 5.8.10 Rules of Procedure

589 Bodies may establish additional Rules of Procedure that may apply to themselves, to their child Bodies,
590 or to both. Rules of Procedure may include specific additional processes that must not be inconsistent
591 with DMTF Bylaws, policies, or this document. Any Member may escalate a Rules of Procedure that they
592 believe contradicts DMTF Bylaws, policies, or this document by means of the Escalation Procedure
593 (clause 5.8.11). All effective Rules of Procedure for any Body must be accessible from the Body's public
594 facing web page. Rules of Procedure are approved by the Board (clause 6).

595 5.8.10.1 Financial rules

596 Forums and Chapters may establish additional fees for the purpose of funding their activities.
597 Participation in such Bodies may be subject to payment of the fees described in their Rules of Procedure.

598 Approval of contracts, budgets, statements of work and expenses for all DMTF Bodies are subject to
599 DSP4010 - DMTF Financial Process and Procedures.

600 5.8.10.2 Other rules

601 The following is a non-exclusive list of the types of items that might be contained in a Body's Rules of
602 Procedure:

- 603 • Procedures for submitting items for consideration and the forms attendant thereto.
604 • Specification of tools to be used for test, document generation, or otherwise in the pursuit of the
605 Body's Charter.
606 • Naming conventions, or other sorts of conventions necessary for the orderly pursuit of the
607 Body's Charter.

608 5.8.10.3 Prohibited rules

609 No Rules of Procedure document may:

- 610 • Violate any provision of the DMTF Bylaws, policies, or this document.
611 • Diminish any Member's rights as defined in DMTF Bylaws, policies, or this document, including
612 those rights that accrue based on their membership level.
613 • Include any provision disapproved by the Board through escalation or prior escalation.

614 5.8.10.4 Rules of Procedure approval

615 The proposing Body's Parent Committee approves Rules of Procedure.

616 Committee-approved Rules of Procedure go into effect 31 days past approval to permit potential
617 escalations by objecting Members.

618 After a Member notifies the chair that an objection to a Rules of Procedure document not currently in
619 effect is being escalated, the proposed Rules of Procedure shall be stayed until the escalation is
620 complete.

621 5.8.11 Escalations

622 When an action taken or not taken by a Body or Member is alleged to be in violation of the policies,
623 processes, and procedures set forth by the DMTF, Members should attempt to resolve the disagreement
624 within the Body. If resolution is unsuccessful, the dispute must be documented in the Body's minutes. Any
625 Member may appeal by means of an escalation. The creation of an escalation results in review of the
626 situation and resolution by the Parent Body.

627 5.8.11.1 Responsibilities

628 When a Member raises an escalation, it is the responsibility of the chair of the Parent Body to place the
629 issue on the agenda for discussion within the earlier of the next 3 regular meetings or 30 days.

- 630 • The Parent Body chair must inform the originating Body chair and the escalating Member of the
631 escalation as to when it will be on an agenda for discussion. During that agenda slot, the
632 originator and origin Body's chair are invited to attend regardless of normal participation rights.

633 5.8.11.2 Escalation requirements

634 The complaint should state the nature of the objection(s) in writing, including any direct and material
635 adverse effects upon the appellants; the relevant clause(s) of the DMTF policies, procedures, or
636 processes at issue; the actions or inactions at issue; and the specific remedial action(s) that would satisfy
637 the appellants' concerns.

638 5.8.11.3 Timeline

639 An escalation must be raised within 30 days of the contested action.

640 5.8.11.4 Further escalation

641 If the Member escalating an issue is dissatisfied by the decision of the Parent Body, the escalation may
642 be raised to the next level in the organization.

643 5.8.11.5 Final decisions

644 Escalations that reach and are decided by the Board of Directors are final.

645 5.8.12 Voting

646 The voting processes are designed to be adaptable to the size of the Body, the nature of the question,
647 and efficiency of operation. In the case where there is a manageable number of voters and the chair is
648 satisfied that the minimum number of voters necessary for the type of Body are present, a call for
649 unanimous consent is in order and may be used as determined by the chair. If an objection exists, a vote
650 is taken.

651 5.8.13 Vote counting

652 Vote counting may be by any means that the chair determines will yield an accurate count unless an
653 incidental motion specifying a particular type of counting has been passed. In no case are abstentions
654 counted or recorded.

655 Each voting Participation Member or Leadership Member may cast only one vote in any DMTF Ballot
656 conducted by any means. If a Participation Member or Leadership Member casts more than one vote, the
657 chair shall select the vote cast by the Primary Voter. If the Primary Voter has abstained and there exists
658 conflict amongst the votes cast by Alternate Voters, the chair shall discard all votes by the Participation
659 Member or Leadership Member.

660 5.8.14 DMTF majority rules

661 All motions in the DMTF, unless specified herein, require a 2/3 majority of votes cast to pass. In addition,
662 there shall be a minimum of four votes cast by votes taken by a Committee unless specified by the Board;
663 all other bodies shall have a minimum of three votes cast. A Body may decide to reduce this majority rule
664 to those majorities stipulated in RONR by means of a motion to waive the 2/3 rule, which shall pass with a
665 minimum of a 75% majority.

666 5.8.15 Motions related to methods of voting

667 Any member may make an incidental motion to specify a voting mechanism during debate on a question
668 or at any time until but not after the question on another motion has been stated. This incidental motion
669 shall require a simple majority to pass (RONR §30).

670 Typical incidental motions include:

- 671 • Motion for an Electronic Ballot q.v.
- 672 • Motion for a standing vote (or show of hands)
- 673 • Motion for a roll-call vote

674 5.8.16 Requesting another Body to Ballot

675 Should a vote be solicited of a Body other than the originating Body, such as a Ballot request to a Parent
676 Body, an email containing all the particulars shall be sent to Ballot-request@dmf.org requesting that a
677 Ballot be opened to implement that request.

678 5.8.17 Electronic Ballots

679 Because RONR discusses but does not specify the procedures for Electronic Ballots, the rules governing
680 Electronic Ballots are described herein.

681 5.8.17.1 Validity

682 Electronic Ballots have equal weight and validity to other voting mechanisms described in Robert's Rules
683 of Order Newly Revised.

684 5.8.17.2 Electronic Ballot lifecycle

- 685 • A motion that will be decided by Electronic Ballot is made, discussed, and potentially amended.
- 686 • An Electronic Ballot is opened by the chair during, or subsequent to, the meeting.
- 687 • The Electronic Ballot remains open for the time agreed unless extended.
- 688 • Votes may be made or changed until the result is declared.

689 • In the meeting in which the Electronic Ballot is scheduled to close, or subsequent to the
690 scheduled closure of an Electronic Ballot, but before it is declared, comments may be discussed
691 and voters may change their votes.

692 • After all vote changes have been made, the chair declares the result.

693 **5.8.17.3 Amendments**

694 Motions that are to be decided by Electronic Ballot may only be amended until the question has been
695 called. The question, as well as any associated references or documents, shall remain static for the
696 duration of the Electronic Ballot and shall be documented therein.

697 **5.8.17.4 Comments**

698 Comments, when appropriate, may be considered at the discretion of the chair whether or not the vote
699 associated with the comment was counted or if the comment is associated with an abstention. Those
700 wishing to comment who are not Leadership or Participation Members may do so by means of an
701 abstention with comment.

702 **5.8.17.5 Incorporation of comments**

703 Although comments are encouraged to receive the widest possible review, the question, including
704 attachments and associated documents, shall not be altered during comment disposition. A new Ballot by
705 any permitted means is required to approve a question or document with changes that are the result of
706 comments received during the process of an Electronic Ballot.

707 **5.8.17.6 Duration**

708 Electronic Ballots shall be open for a period of no less than 152 hours (six days plus eight hours). An
709 incidental motion made prior to declaration by any member and agreed to by simple majority may extend
710 the duration. Implicitly, Electronic Ballots are open until the results are declared in the next meeting of the
711 Body after the agreed closure time has expired or a meeting scheduled for an interval that includes the
712 scheduled closure time occurs.

713 **5.8.17.7 Closure and declaration**

714 If an Electronic Ballot closes between meetings of the voting Body, the declaration of the Ballot must be
715 part of the next meeting of that Body. It is recommended that chairs set up the Electronic Ballot to close
716 during the meeting itself. The following procedures are for closing and declaring the results of the
717 Electronic Ballot:

- 718 • The early part of the agenda for the voting Body must include an item for closing Electronic
719 Ballots.
- 720 • The voting Body may discuss any comments made during the Balloting period.
- 721 • Members of the voting Body may either cast or change their existing vote. The responsibility for
722 recording this change falls upon the chair. The votes shall be recorded in the Electronic Ballot.
- 723 • The chair of the voting Body closes the Electronic Ballot and declares the results.

724 **5.8.17.8 Recording of Electronic Ballots**

- 725 • Motions subject to Electronic Ballot are recorded in the minutes of each meeting in which an
726 action is taken with respect to that Electronic Ballot.
- 727 • The question as well as the decision to perform an Electronic Ballot are recorded in the minutes
728 of the meeting in which they are made.

- 729 • Incidental motions to extend the closure of an Electronic Ballot are recorded in the minutes of
730 the meeting in which they are made.
- 731 • The results of an Electronic Ballot are recorded in the minutes of the meeting in which they are
732 declared.

733 **5.8.17.9 Responsibility to manage**

734 Electronic Ballots shall be opened, managed, and closed by the chair or designee.

735 **5.8.17.10 Identification of Electronic Ballots**

736 Electronic Ballots shall be distinguished from other forms of information gathering, such as preference
737 polls, requests for comments (RFC), or other informal polls, by starting the text of the question with
738 "Motion to"; shall state the question upon which the Body is voting; and shall have voting options of yes,
739 no, and abstain. Any other use of electronic voting facilities shall not be considered Electronic Ballots
740 under this clause.

741 **5.8.18 DMTF recording policy**

742 DMTF meetings of any Body may not be audio or video recorded under any circumstances:

743 **5.8.19 Minimum requirements for meeting minutes**

744 All meetings of any DMTF body, when that Body has adequate participation to permit decisions, must
745 result in minutes that record decisions made. The contents of such minutes follow rules established in
746 RONR 11th ed.

747 **5.8.19.1 Meeting minutes format**

748 The preamble to the minutes shall include:

- 749 • The kind of meeting – regular, special, adjourned regular or adjourned special; and
- 750 • The name of the Body; and
- 751 • The date and time (hour) of the meeting; and
- 752 • The location of the meeting in the case of a face-to-face meeting or simply the notation that it
753 was a teleconference if there was no physical location; and
- 754 • The fact that the regular chair, vice-chair, or co-chair and secretary (minute-taker) were present
755 or, if not, the name of the persons serving in these capacities; and
- 756 • Whether the minutes of the previous meeting(s), identified by date, were approved as posted or,
757 if corrected, the notation that they were approved as corrected. Corrections are made in the
758 minutes of the previous meeting and not detailed in the current minutes.

759 The body of the minutes shall include:

- 760 • A separate paragraph for each subject.
- 761 • The wording of each main motion as adopted or otherwise disposed of, as well as the name of
762 the mover. The seconder (if any) is not recorded. Motions that are withdrawn are not recorded.
763 The existence of motions to amend or of debate may be recorded but only parenthetically.
- 764 • If a main motion is disposed of temporarily, then any motions to amend and secondary motions
765 that adhere to the main motion are recorded that are pending at the time of disposal.

766 The minutes shall end with the hour of adjournment.

767 Significantly more detail is provided in RONR (11th ed.) §48.

768 **6 DMTF release process, document information, and file formats**

769 Documents are sorted into classes and a procedure is defined in this clause for each class. The classes
770 are:

- 771 • Normative documents such as:
 - 772 • DMTF Standards
 - 773 • DMTF Informative Standards
 - 774 • Schemata
- 775 • Informative documents such as:
 - 776 • Presentations
 - 777 • White papers
 - 778 • Posters
 - 779 • Software (executable or source code)
 - 780 • Use-cases or requirements
 - 781 • Marketing material for distribution to the DMTF Membership
- 782 • Policy documents such as:
 - 783 • This document
 - 784 • Other documents defining DMTF processes or procedures
 - 785 • Corporate policies
 - 786 • Charters
 - 787 • Body Rules of Procedure
 - 788 • Marketing material for public distribution
 - 789 • Budgets
 - 790 • Contracts and their addenda
- 791 • Source code such as:
 - 792 • Open source projects
 - 793 • Test code
 - 794 • Sample implementations

795 **6.1 Overview**

796 The steps in the release process for a normative document are as follows:

- 797 • DSP identifier acquisition (clause 6.2)
- 798 • Development (clause 6.3)
- 799 • Work in Progress (recommended) (clause 6.4)
- 800 • Technical Committee approval (clause 6.6)

801 • IP solicitation (clause 6.7) and parallel Board approval (clause 6.8)

802 • Publication (clause 6.9)

803 The steps in the release process for an Informative document are as follows:

804 • DSP identifier acquisition (clause 6.2)

805 • Development (clause 6.3)

806 • Work in Progress (recommended) (clause 6.4)

807 • Parent Committee approval (clause 6.5)

808 • Publication (clause 6.9)

809 The steps in the release process for a Policy document are as follows:

810 • DSP identifier acquisition (clause 6.2)

811 • Development (clause 6.3)

812 • Work in Progress (potential) (clause 6.4)

813 • Parent Committee approval (clause 6.5)

814 • Board approval (clause 6.8)

815 • Publication (clause 6.9)

816 The steps in the release process for Source code are as follows:

817 • DR approval (clause [6.2](#))

818 • Development (clause 6.3)

819 • Parent Committee approval (clause 6.5)

820 • Board approval (clause 6.8) for initial release

821 • Publication (clause 6.9)

822

823 **6.2 DSP identifier, acquisition, transfer, disposal**

824 Applies to document classes:

825 • Policy documents

826 • Normative documents

827 • Informative documents

828 As exceptions, the following documents do not require DSP identifiers:

829 • Charters

830 • Rules of Procedure

831 • Press releases or other marketing collateral

832 • Newsletters or other Member communications

833 • Posters, brochures, or other graphics for promotional display or distribution

834 • Web pages

- 835 • Bylaws or any other corporate document or filing
- 836 • Source code

837 DSP identifiers are used to identify all applicable DMTF documents. At most one editing body may have
838 ownership of any DSP identifier at a time. A document request (DR 6.2.1) is used to acquire a new DSP
839 identifier, dispose of one previously acquired but unused, obtain ownership for the document associated
840 with a DSP identifier, obtain approval of a new schema name, obtain approval for publication of DMTF
841 material to a non-DMTF location, or to change the document's name or disposition. The Editing Body's
842 Parent Committee must approve DRs before any work begins in an Editing Body.

843 **6.2.1 Document Request (DR) content and format**

844 DRs must be created by using the [DR template](#). The content of this template includes:

- 845 • Chair(s) of the Body requesting the DSP identifier
- 846 • Document Class being requested (Normative, Informative, Policy, Source code)
- 847 • Name of the associated document or artifact
- 848 • DSP identifier if previously issued
- 849 • Name of the Editing Body
- 850 • Date the request began
- 851 • Action requested:
 - 852 • Issue DSP identifier
 - 853 • Transfer Ownership
 - 854 • Return DSP identifier
 - 855 • Re-title
 - 856 • Publication of Source
 - 857 • Publication of Executable
 - 858 • Add New GitHub Repository
 - 859 • Publish GitHub Repository Publicly
- 860 • Background rationale for the accompanying document
- 861 • Intention to publish or submit to (see clause 6.13)

862 **6.2.2 DR preparation and submittal**

863 The Editing Body prepares the DR clearly indicating the action proposed. Once prepared, the DR should
864 be added to the appropriate group's Document Request folder by the DR owner with a status of "Draft."
865 Documents added to the Document Request folder are automatically named with the following format:

866 `wgabbrevDR$docnum.$revnum.$extension`

867 DRs shall only be submitted by chairs.

868 DRs shall be shared with the Parent Committee prior to voting in the Parent Committee.

869 **6.2.3 DR approval**

870 The Editing Body must vote to approve the DR. Once approved by the Editing Body, the DR document
871 proceeds to the Parent Committee for approval. Some DRs, such as those that take GitHub repositories
872 public, also require board approval. After the Parent Committee (or DMTF board if applicable) approves
873 the DR, the Committee Secretary notifies the Editing Body that the DR is approved, the name of the
874 document that was approved, and the action taken.

875 **6.2.4 DSP Number ranges**

876 DSP identifiers associated with DMTF documents fall into the following ranges:

- 877 • 0001-0999 – Technical Specifications
- 878 • 1000-1999 – Profiles

- 879 • 2000-2999 – White Papers, Technical Notes, and other informational documents
- 880 • 3000-3999 – Working Group Charters
- 881 • 4000-4999 – DMTF Process documents
- 882 • 5000-5999 – Conformance Specifications, test scenarios, and other test-related artifacts.
- 883 • 6000-6999 – Machine Readable Profiles
- 884 • 8000-8999 – Schema Representations
- 885 • IS-0000 - IS-9999 – Informational Specifications

886 DMTF documents that were approved before December 31, 2004, may have DSP identifiers that are
 887 outside of the preceding ranges. When these documents are revised, they must be changed to conform
 888 to these ranges. However, documents should not be revised only for the purpose of placing them in the
 889 appropriate number range.

890 **6.3 Development**

891 Applies to document classes:

- 892 • All document classes

893 Prerequisites:

- 894 • DSP Identifier has been issued if required (clause 6.2).
- 895 • A DR has been processed and approved if required (clause [6.2](#)).

896 When an Editing Body is in the process of developing a document, the document shall have a document
 897 status of "Draft" and a confidentiality notation of "DMTF Confidential." A document remains in
 898 development until published.

899 For Source Code, the code shall only be developed in a Body with a charter that allows it. The code
 900 repository shall meet the following requirements:

- 901 • There shall be a Readme declaring the scope of the code. This scope shall be in alignment with
 902 the approved DR.
- 903 • There shall be a Licensing statement that conforms with the DMTF Software Submission
 904 Agreement
- 905 • Source Code should be developed within a Body and shall be managed during DMTF meetings.

906 **6.4 Work in Progress**

907 Applies to document classes:

- 908 • All document classes

909 Prerequisites:

- 910 • A document in Development (clause 6.3)
- 911 • A vote in the Editing Body to publish a Work in Progress release

912 Working Groups are encouraged to publish Work in Progress documents early and often. An interval
 913 between publications of Work in Progress documents of three months is considered usual. A Work in
 914 Progress release may contain any degree of change.

915 **6.5 Parent Committee approval**

916 Applies to document classes:

- 917 • Informative documents
- 918 • Work in Progress documents
- 919 • Process documents

920 Prerequisites:

- 921 • Work is complete for the candidate document.
- 922 • Substantially all non-deferred issues have been resolved.
- 923 • Editorial review in a manner acceptable to DMTF Admin has been completed.
- 924 • A vote in the Editing Body to release the document has passed.

925 Exceptions:

- 926 • Work in Progress documents may have any number of open issues.
- 927 • Work in Progress documents do not require editorial review.

928 The Parent Committee Ballots the document for publication to assure that it is within the Editing Body's
929 scope as defined in the charter, and that process has been followed in its production. Documents with
930 obvious quality problems may be rejected on that basis.

931 **6.6 Technical Committee approval**

932 Applies to document classes:

- 933 • Normative documents
- 934 • Source code

935 Prerequisites:

- 936 • Work is complete for the candidate document.
- 937 • Substantially all non-deferred issues have been resolved.
- 938 • Editorial review in a manner acceptable to DMTF Admin has been completed.
- 939 • The Editing Body has voted to release the document.

940 The Technical Committee Ballots the document for publication to assure that it is within the Editing Body's
941 scope as defined in the charter, and that process has been followed in its production. Documents with
942 obvious quality problems may be rejected on that basis.

943 All normative document approval Ballots shall be electronic. Normal and usual voting methods for
944 electronic Ballots are observed (clause 5.8.17).

945 Normative documents presented for Technical Committee review may be, subsequent to Technical
946 Committee approval, published as a Work in Progress at the discretion of the Technical Committee.

947 When the Technical Committee has approved the normative document, it shall be forwarded directly to
948 DMTF Admin for publication pending completion of IP Solicitation and Board approval, which should
949 occur in parallel to the extent possible.

950 Upon request or recommendation of a child body, the Technical Committee may delay the publication
951 date of a normative document if supporting artifacts or dependent documentation have not yet been
952 brought to the Technical Committee for approval; the delay shall not exceed a period longer than 90 days.

953 **6.7 IP solicitation**

954 Applies to document classes:

- 955 • Normative documents
- 956 • Source Code

957 Prerequisites:

- 958 • Technical Committee has approved the document or repository for publication.

959 The Technical Committee shall determine if an IP solicitation is needed on any draft normative document
960 presented for approval. An IP solicitation is required for any new normative document or initial source
961 code release and may be indicated if changes made by the Editing Body result in new feature or function.
962 Changes to Source Code licenses or major source code release shall trigger IP solicitation. The
963 Technical Committee may decide that no IP solicitation is required if the Editing Body makes such a
964 recommendation and changes from a previously approved version contain no substantive modifications to
965 function or feature.

966 The chair of the Technical Committee sends the candidate document and a notice asking for claims of
967 essential patent rights to the DMTF Membership. The DMTF IP solicitation period closes 30 days after the
968 notification is sent.

969 If no claims of essential patent rights are received by DMTF Admin upon the expiration of the IP
970 solicitation period, the document or source code shall then be published.

971 If claims of essential patent rights are received, then DMTF Admin shall halt publication and shall inform
972 the Technical Committee which shall then follow the steps as defined in the DMTF Patent and
973 Technology Policy (DMTF Patent and Technology Policy). No publication is permitted until those steps
974 have been completed.

975 **6.8 Board approval**

976 Applies to document classes:

- 977 • Policy documents
- 978 • Normative documents
- 979 • Initial release of Source Code

980 Prerequisites:

981 Parent Committee approval has been achieved.

982 Procedure:

983 The document or associated DR is added to the agenda of the next board meeting. It is the responsibility
984 of the approving committee chair to assure that the document is raised for a vote at the next board
985 meeting. The document must be made available to the board in time for a reasonable review prior to the
986 board meeting.

- 987 • If the board approves the document, it shall be forwarded to DMTF Admin for publication.
- 988 • If the board rejects the document, it shall be returned to the Editing Body with comments, if any.

- 989 • If the board fails to act on the document, it shall be added to the agenda for the next board
990 meeting in the early part of the agenda.

991 **6.9 Publication**

992 Applies to document classes:

- 993 • Policy documents
- 994 • Informative documents
- 995 • Normative documents
- 996 • Source Code

997 The DMTF publication process proceeds after there are no more approvals.

998 The secretary or chair of the final approving body forwards the document to DMTF Admin who then
999 produces and publishes the final version of the document.

1000 The steps in publication include the following activities.

- 1001 • Pre-publication cleanup
1002 Consists of assuring correct front-matter format and content, change of document status and
1003 publication date, removal of confidentiality notifications, and removal of the version identification
1004 except for Work in Progress releases.
- 1005 • Archiving
1006 DMTF Admin will copy the document to a secure location for long-term storage.
- 1007 • If a normative document, and an IP solicitation was required, hold publication until verification of
1008 successful completion of the IP solicitation.
- 1009 • Movement to the published document location on the DMTF web site
1010 DMTF Admin will publish the document on the DMTF web site or public DMTF GitHub
1011 repository.
- 1012 • For Source Code, the code repository shall meet the following requirements:
 - 1013 • There shall be a Readme declaring the scope of the code.
 - 1014 • There shall be a Licensing statement that conforms with the DMTF Software Submission
1015 Agreement.
 - 1016 • Developer Certificate of Origin (DCO) shall be enabled.

1017 Specifications are published and a URI is generated for the document according to the document name
1018 (clause 6.11). The document is then published on the “published documents” page and added to the
1019 appropriate document directory.

1020 **6.10 Front matter, numbering, and versioning for DMTF documents**

1021 **6.10.1 DMTF document front matter, headers, footers**

1022 Applies to document classes:

- 1023 • Normative documents
- 1024 • Informative documents
- 1025 • Policy documents

1026 Exceptions:

- 1027 • Charters
- 1028 • Rules of Procedure
- 1029 • Press releases or other marketing collateral
- 1030 • Newsletters or other Member communications
- 1031 • Posters, brochures, or other graphics for promotional display or distribution
- 1032 • Web pages
- 1033 • Bylaws or any other corporate document or filing
- 1034 • Marketing materials

1035 DMTF documents must begin with a front page that shall contain the following information. These items
1036 are included in the document template.

- 1037 • Title
- 1038 The title of the document as registered when the DSP identifier was obtained.
- 1039 • DSP identifier
- 1040 This must be the DSP identifier obtained according to the policy described in clause 6.2.
- 1041 • Version number
- 1042 This version number must comply with the guidelines in clause 6.11.
- 1043 • Date
- 1044 This must be the effective date of the document.
- 1045 • Logo
- 1046 A DMTF logo should be included on the title page.
- 1047 • Document Class
- 1048 "Policy," "Normative," or "Informative."
- 1049 • Document Status
- 1050 "Draft," "Work in Progress," "Candidate Specification" or "Published."
- 1051 • Document Disclaimer if any
- 1052 In the case of DMTF Works in Progress it shall be:
- 1053 "IMPORTANT: This document is not final. It does not necessarily reflect the views of the DMTF or its
- 1054 members. Because this document is a Work in Progress, this document may still change, perhaps
- 1055 profoundly and without notice. This document is available for public review and comment until
- 1056 superseded."
- 1057 • Documents Superseded, if any
- 1058 • Document Language
- 1059 • "DMTF Confidential" label for all DMTF documents prior to public release by DMTF

1060 Page 2 of the document shall contain the following information:

- 1061 • DMTF Copyright Notice
- 1062 • DMTF Patent Policy Notice (DMTF Patent and Technology Policy)

- 1063 • Notice that “The English version of this specification is the only normative version”
- 1064 • Notice that all feedback or comment is to be provided through the DMTF Feedback Portal
- 1065 <http://www.dmtf.org/standards/feedback>

1066 Page headers shall contain:

- 1067 • DSP identifier
- 1068 • Document Title

1069 Page footers shall contain;

- 1070 • Page number
- 1071 • Confidentiality notation
- 1072 “DMTF Confidential” unless published as final or as a Work in Progress
- 1073 • Status
- 1074 “Draft,” “Work in Progress,” or “Published”
- 1075 • Version number

1076 **6.10.2 Exception for non-display formats**

1077 Non-display formats such as XML files, source codes, and other machine-readable formats shall contain
1078 a comment or a file within its collection that contains the same information as in 6.10.1 above; however,
1079 the DMTF Logo is optional.

1080 **6.11 Document numbering and versioning, and filenames**

1081 **6.11.1 Normative, Informational and Draft Versioning**

1082 Versioning of DMTF documents takes the form $m.n.u[d[d]]$, where:

- 1083 ***m*** represents the major version identifier in numeric form. This number starts at 1 for new
1084 documents. A change in this number representing an update to the document indicates that the
1085 document contains changes that are not compatible with prior versions.
- 1086 ***n*** represents the minor version identifier in numeric form. This number starts at 0 for new
1087 documents. A change in this number representing an update to the document indicates that the
1088 document contains changes that are compatible with prior versions.
- 1089 ***u*** represents the update (errata or coordination changes) in numeric form. This number starts at 0
1090 for new documents. A change in this number representing an update to the document indicates
1091 that the document contains changes that are corrections to errors in prior versions or changes
1092 in coordination with other documents. This digit may not be changed for Work in Progress
1093 documents.
- 1094 ***dd*** represents the draft level in alphabetic form. This indicator is required for DMTF draft
1095 documents.

1096 Updated versions of documents must have one of these digits or letters changed from prior versions in
1097 increasing order; gaps in the order are permitted.

1098 Published documents are represented using only numeric entries (for example, 2.1.0 or 2.2.1).

1099 All DMTF document in draft status must have the draft level identified. Any references to the specification
1100 version must include the alpha identifier (*dd*) appended to the identifying version number.

1101 Drafts are denoted starting with a single alpha character and, if necessary, progressing to two-letter
 1102 notation: a, b, c ... x, y, z, aa, ab...zz.

1103

1104 **6.11.2 Work in Progress Versioning**

1105 Versioning of DMTF Work in Progress documents shall adhere to the format that the following table
 1106 describes:

1107

Table 2 – Work in progress versioning

Published file name	Description of approximate stage of development
DSPXXX_1.0.0WIP.01-29	First draft with outline and initial text
DSPXXX_1.0.0WIP.30-49	Base features complete, major updates expected
DSPXXX_1.0.0WIP.50-59	Most major additions complete, minor changes expected
DSPXXX_1.0.0WIP.60-89	All major release features included, solicitation for feedback advertised
DSPXXX_1.0.0WIP.90-98	All major release features complete, minor updates remaining
DSPXXX_1.0.0WIP.99	Complete in final review and ready for standard or informational release
DSPXXX_1.0.0WIP	Co-released when a completed document is currently in the approval process

1108 WIP artifacts are released at the discretion of the editing body. The editing body shall determine the WIP
 1109 version based on the approximate developmental stage of the WIP artifact. Editing bodies are not
 1110 required to release WIP versions at each stage. The component pieces of a WIP.zip bundle shall reflect
 1111 the WIP version of the bundle where possible.

1112 **6.11.3 File names**

1113 The filename for published DMTF documents should use this format:

1114 "DSP"<4 digit document number>"_ "<m>"."<n>"."<u>"WIP."<WIPNUM>"-"<t>"."<file
 1115 extension>"

1116 where:

1117 **WIPNUM** is the Work in Progress designation assigned by the authoring body.

1118 **t** is the two letter ISO language identifier as specified in ISO 639-1:2002.

1119 The language identifier, **t**, and the preceding “-“ may be omitted in English-language normative
 1120 documents but are required for all translations.

1121 Additionally, this information must be embedded inside the specification itself. When specifying the
 1122 document number for DMTF specifications numbered below 1000, the leading zero must be specified.
 1123 For example, "DSP0825_1.0.0.pdf" is correct, while "DSP825_1.0.0.pdf" is not.

1124 **6.12 Accepted file formats**

1125 DMTF sources should be in one of the formats that Table describes.

1126 **Table 3 – Accepted source formats**

Source type	Approved formats
MOF	UTF-8 text format
UML	XMI (.xmi)
Diagrams	Visio, SVG or ODF
Presentations	PowerPoint (.ppt, pptx), Visio (.vsd, .vsdx), or ODF
Specifications	Word (.doc, .docx), ODF, HTML, UTF-8 or UTF-16 text format, Visio, or Markdown (md)
Text	Text (.txt)
Web	Hypertext .htm .html
Image	JPEG (.jpg, .jpeg), Raster (.eps, .png,) Vector (.svg)
Source Code	Varies per programming language
Internal Document	Excel (.xlsx, .xls) Word (.doc, .docx) PowerPoint (.ppt, .pptx)

1127 Note that source for graphical representations of UML or for class or instance diagrams can be either XMI
1128 or Visio.1129 The Editing Body must submit DMTF documents for approval in a format that Table describes. The
1130 Editing Body must also provide access to the document source.1131 **Table 4 – Permitted published formats**

Artifact type	Approved formats
Source Code and other machine-readable artifacts	UTF-8 text, or as required
UML	PDF
Specifications, DMTF Standards, White Papers, Technical Notes	PDF and HTML
Bundled Schema, Mockups, Informational Specification Bundles	ZIP (.zip - may contain .pdf, .xml, .yaml, .json, .bin, .map)

1132 Supplemental information may be provided in HTML (for example, hyperlinked MOF documentation),
1133 UTF-8 text format (for example, XML MOF rendering), PDF, Visio, or as appropriate for the intended use.1134 Published artifacts or collections of artifacts, may be provided in compressed (.zip) format for download
1135 convenience.1136 **6.13 Document disposition**1137 DMTF documents, after reaching their final approval at either the Board or the Committee levels, are
1138 usually published through the DMTF web site. Some circumstances require that DMTF documents be
1139 released in an alternate manner instead of, or in addition to, publication on the DMTF web site, for
1140 example, when a document is released to another entity. This clause describes the requirements and
1141 methods for the dispensation of documents.

1142 6.13.1.1 Submission and transfer

1143 When the document is intended to be either transferred or submitted to another organization, the
1144 document needs to have a statement regarding the nature of the submission or transfer and a statement
1145 about copyright grant. This statement can be either a part of the document or a separate document, such
1146 as a cover letter. An IP disclaimer should be included if the document is a specification. When the
1147 document is source code, an open source license conformant with DMTF policy should be included in the
1148 source. If included, the document is subject to approval by DMTF legal counsel before release.

1149 Documents intended to be published by, submitted or transferred to another organization are subject to
1150 DMTF Board approval regardless of Document Type and Final Document Status, with the exception of
1151 informational presentations to be presented at public forums such as conferences and symposiums. A
1152 DR should be prepared that contains the appropriate information about the request and then taken
1153 through the process as defined in clause 6.2 prior to DMTF Board approval.

1154 6.13.2 Availability of document versions and obsolescence

1155 The release of a new version of a specification, white paper, or document does not make previous
1156 versions obsolete. Versions become obsolete when the market no longer requires them. The underlying
1157 goal is upward compatibility between versions. This goal should be approached with caution because
1158 maintaining upward compatibility between versions may not always be possible.

1159 Updates to a specification, white paper, or document are submitted to the Editing Body. Each
1160 specification must contain a change history. (For graphical documents, such as UML diagrams, that are
1161 not conducive to including a change history, this history is included in the MOF file.) The status of these
1162 documents must be indicated as "Work in Progress," "Informational," "DMTF Draft Standard," or "DMTF
1163 Standard." A change log and completed Change Request forms must be maintained for all specifications,
1164 white papers, and documents.

1165 Specifications and other documents that have reached a level of maturity where they are no longer
1166 actively being updated should be posted to a clause of the DMTF web site dedicated to "historical"
1167 documents. The web site must contain information indicating that this specification is still relevant to the
1168 industry but new versions should not be expected. Specifications that are greater than five years old and
1169 are DMTF Standard should be reviewed by the owning Parent Committee annually to see if they should
1170 be moved to this portion of the web site, but the URL to the document should not change. Previous
1171 versions of MOF Schema that are greater than two years old may fall into the "historical" category and
1172 should be treated appropriately. Note that the URI of the document should remain persistent (remain the
1173 same over time) to allow other specifications to reference DMTF Standards.

1174 7 Issue resolution

1175 7.1 Issue resolution process

1176 During the normal course of document development or approval, issues may be raised against
1177 documents. It is expected that all issues shall be resolved or addressed before the issue is closed. Issues
1178 may be raised by members of the Editing Body in committee or during Ballot, by Parent Bodies during
1179 review or approval, during the IP solicitation phase of document approval, or by external entities for
1180 Works in Progress.

1181 7.1.1 Issue tracking and recordkeeping

1182 All issues reported shall be recorded and the record kept as part of the Editing Body's permanent records.
1183 The record shall contain the following minimum information:

- 1184 • Date issue was reported
- 1185 • Issue reporter

- 1186 • Issue description
- 1187 • Date issue was resolved
- 1188 • Resolution description
- 1189 • Document revision containing resolution
- 1190 • Evidence that the issue reporter has accepted the resolution in the case of an external reporter

1191 **7.1.1.1 Recordkeeping mechanism**

1192 Any method may be used to track issues. The DMTF provides a number of tools that may be used;
1193 however, any method that is persistent and that may be archived can be utilized.

1194 **7.1.2 Editing Body final decisions**

1195 Issues are decided according to voting rules defined herein (clause 5.8.14). In the case that a reporter
1196 does not agree with the issue resolution as proposed by the editing Body and provides a rationale that
1197 may be considered new information, a simple majority vote in the Editing body may be performed to re-
1198 open the issue. Should that simple majority vote fail, the resolution of record may be considered final.

1199 **8 DMTF Management Initiatives**

1200 "Management Initiative" is a term used to describe a set of activities, specifications, or documents that
1201 address a domain of DMTF organizational emphasis. Management Initiatives may be proposed by any
1202 Member, but are reviewed and approved by the Board of Directors due to the anticipated strategic
1203 importance and commitment of resources of such initiatives.

- 1204 • Management Initiatives must have technical components involving one or more Bodies.
- 1205 • Management Initiatives must have requirements for messaging or technical evangelism to
1206 promote the Management Initiative for the mutual benefit of the DMTF membership.
- 1207 • Proposals for new Management Initiatives are presented to the Board and are enacted when
1208 approved. Proposals should include the reason why it is a particularly good opportunity for the
1209 DMTF, the activities expected, a schedule, and any anticipated budget impact.

1210 **8.1 Management Initiative coordination**

1211 The Board may appoint a lead for the purpose of coordinating each Management Initiative. If no lead is
1212 appointed, the Marketing Taskforce shall coordinate all messaging components with the chairs of the
1213 participating Bodies.

1214 **9 Information access**

1215 A policy of the DMTF is to have stable information available to its members. Body members are entitled to
1216 have access to any pertinent data related to the decisions and operations of the team.

1217 **9.1 Web posting**

1218 It is the responsibility of the chairs to ensure that all of the data required for the work of the team is made
1219 available to all participants. Chairs accomplish this by posting to the Body's web page in the "Members
1220 Only" clause of the DMTF web site.

1221 **9.2 Email lists**

1222 The DMTF maintains email lists for each Body for distributing information to its members. The email lists
1223 are for the internal use of the Body's members in support of their development or marketing activities.
1224 These lists are not for general dissemination of information.

1225 **9.3 Information restriction**

1226 The restriction of unpublished information to a Body and those that are necessary to approve publication
1227 is to protect the DMTF and all its members from partial ideas or incomplete or inaccurate information
1228 taken out of context. Participants understand the history and context of this internal information.

1229 **9.4 Information dissemination**

1230 Members are permitted to disseminate unreleased DMTF information within their organization as long as
1231 the information is marked as "DMTF Confidential." Confidential information should not be redistributed to
1232 any non-member without the permission of the DMTF Board of Directors.

1233 **9.5 Document information**

1234 Document information is generally disseminated through the DMTF web site, and the members are
1235 informed of document updates through the DMTF newsletter or other means. Access to the published
1236 document web pages is open to anyone.
