15 management and interoperability. Members and non-members may reproduce DMTF specifications and  
16 documents, provided that correct attribution is given. As DMTF specifications may be revised from time to  
17 time, the particular version and release date should always be noted.

18 Implementation of certain elements of this standard or proposed standard may be subject to third party  
19 patent rights, including provisional patent rights (herein "patent rights"). DMTF makes no representations  
20 to users of the standard as to the existence of such rights, and is not responsible to recognize, disclose,  
21 or identify any or all such third party patent right, owners or claimants, nor for any incomplete or  
22 inaccurate identification or disclosure of such rights, owners or claimants. DMTF shall have no liability to  
23 any party, in any manner or circumstance, under any legal theory whatsoever, for failure to recognize,  
24 disclose, or identify any such third party patent rights, or for such party's reliance on the standard or  
25 incorporation thereof in its product, protocols or testing procedures. DMTF shall have no liability to any  
26 party implementing such standard, whether such implementation is foreseeable or not, nor to any patent  
27 owner or claimant, and shall have no liability or responsibility for costs or losses incurred if a standard is  
28 withdrawn or modified after publication, and shall be indemnified and held harmless by any party  
29 implementing the standard from any and all claims of infringement by a patent owner for such  
30 implementations.

## Introduction

60 This document outlines the DMTF Logo Usage Guidelines and Graphic Standards. The intent of these  
61 guidelines and standards is to ensure consistency in the use and reproduction of all DMTF logos. To  
62 protect and grow the DMTF brand, we have a distinguishable logo that can be used by members and  
63 nonmembers while ensuring consistency of visual impressions associated with DMTF. Guidelines  
64 regarding the logo's appearance and usage are outlined for you in this document.

### 65 **Questions?**

66 If you have questions regarding any of the standards in this guide, or need special permission to use or  
67 change any of the listed guidelines, contact [press@dmf.org](mailto:press@dmf.org).

68 The DMTF & Redfish logo is a registered trademark of DMTF.

69 This document was prepared by the Executive Committee.

70 DMTF is a not-for-profit association of industry members dedicated to promoting enterprise and systems  
71 management and interoperability. For information about DMTF, see <http://www.dmf.org>.

## 73 DMTF Logo Usage Guidelines and Graphic Standards

74 To maintain consistency, the use and reproduction of the DMTF logo is specified by this document. The  
75 following clauses provide specific guidelines for the use of the logo, including size, color, placement and  
76 layout information.

### 77 1 Logo guidelines

78 The following information applies to both color and black and white DMTF logos.

- 79 • This logo replaces all older designs or variations. It is the only graphic device to be used to  
80 signify DMTF.
- 81 • When the DMTF acronym occurs within a headline or body text, do not use this or any logo.  
82 Instead, set the letters DMTF in all caps in the same typeface and size as the rest of the line.

#### 83 1.1 DMTF – color logo

84 The following version in PMS Blue 2738 C is the official DMTF logo and primary version for use. This logo  
85 is the core element in DMTF’s visual identity. Its relative size, positioning and color treatment are  
86 governed by the rules in this guide.

87 NOTE The logo is a unique design and cannot be accurately reproduced with any typeface. It shall not be hand  
88 drawn, scanned or modified in any way. It should be reproduced only from electronic files.

89

90

Figure 1 – DMTF color logo

91 **Color specifications** - PMS Blue 2738 C

92 It can be converted to either of the following:

93 C: 100, M: 87.06, Y: 0, K: 1.96

94 R: 27, G: 66, B: 152

## 1.2 DMTF – black and white logo

Sometimes, often due to production costs, only one color of ink is available and so DMTF's logo must be reproduced in one color. In this scenario, the logo, logotype, or symbol must be used following the convention of using a light color type on a dark background. The logotype and/or symbol outline must be clearly distinguishable from the background color. You must honor the DMTF color palette when possible, using the black and white logo only when necessary.

Figure 2 – DMTF black and white logo

## 2 Logo graphic standards

As a general rule, third parties may use the DMTF logo; however, the logo must always be used pursuant to the graphic standards and usage guidelines. Any use that falls outside of these guidelines is strictly prohibited unless permission has been granted by DMTF. If you require use of the logo on a dark background, email [press@dmf.org](mailto:press@dmf.org) for the approved logo files.

### 2.1 Size requirements

The DMTF logo is designed for the great majority of uses. In print uses, the primary logo should be no smaller than .75" in width. For on-screen uses (web and video), the logo should be at least 75 pixels wide. The logo can only be used horizontally. Do not use the logo below these size ranges.

The digital file you receive may be scaled up or down to meet your design needs. There are some parameters we have created, however, to ensure legibility and appropriateness. When you reduce or enlarge the digital file to suit your needs, the horizontal axis and vertical axis must remain in sync (i.e., scale both the horizontal and vertical amounts at 50%, do not make the horizontal scale 45% and the vertical scale 52%); otherwise, the aspect of the ratio will be thrown off and the image will begin to skew out of proportion.

## 118 2.2 Minimum free space and measurement

119 The logo must have a “buffer” space around it to maintain legibility and visual impact. No other graphic  
 120 elements, such as typography, rules, pictures, etc., should infringe upon this space.

121

122 **Figure 3 – DMTF logo height**

123 The minimum free space needed is given relative to the height of the logo:

124 Where logo height is (h), the required buffer space is .25h.

125

126 **Figure 4 – DMTF logo buffer space**

127 Note that the logo should be centered visually, not mechanically.

## 128 3 Logo usage

129 To ensure the logo is used effectively, the following guidelines must be followed:

- 130 • The logo may not be used in any manner that might imply that any unrelated DMTF materials,  
 131 including but not limited to goods, services, websites, or publications, are sponsored, endorsed,  
 132 licensed by, or affiliated with DMTF.
- 133 • The logo may not be displayed as a primary or prominent feature on any unrelated DMTF  
 134 materials, including but not limited to header, footer, opening line, etc. Member companies  
 135 using the Logo pursuant to these guidelines must also display in the primary and more  
 136 prominent position, their own logo(s), business name, product names, or other branding.
- 137 • The logo may not be imitated or used as a design feature in any manner.
- 138 • The logo may not be used in a manner that would disparage DMTF.

- 139 • The logo must be used as provided by DMTF with no changes, including but not limited to  
140 changes in the color, proportion, or design, or removal of any words, artwork, or registered  
141 symbol. The logo may not be animated, morphed, or otherwise distorted in perspective or  
142 appearance.
- 143 • The logo may never be screened back, built out of four-color process screens, or broken into  
144 multiple colors.
- 145 • The EPS version is high quality and can be scaled to your specific needs.
- 146 • The logo cannot be contained within a box, circle, or other shape; or combined with any other  
147 name, logo, or icon to create a co-branded logo.

148 If you require use of the logo on a dark background, email [press@dmf.org](mailto:press@dmf.org) for the approved logo files.

### 149 **3.1 Statements and uses**

150 DMTF reserves the right, in its sole discretion, to terminate or modify permission to display the logo, and  
151 may request that third parties modify or delete any use of the logo that, in DMTF's sole judgment, does  
152 not comply with these guidelines, or might otherwise impair DMTF's rights to the logo. DMTF further  
153 reserves the right to object to unfair uses or misuses of its trademarks or other violations of applicable  
154 law.

155 Typical uses of the DMTF logo include:

- 156 • Corporate presentations
- 157 • Marketing collateral
- 158 • Press releases
- 159 • Websites
- 160 • Trade show and event signage
- 161 • White papers

162 Unacceptable modifications to the logo:

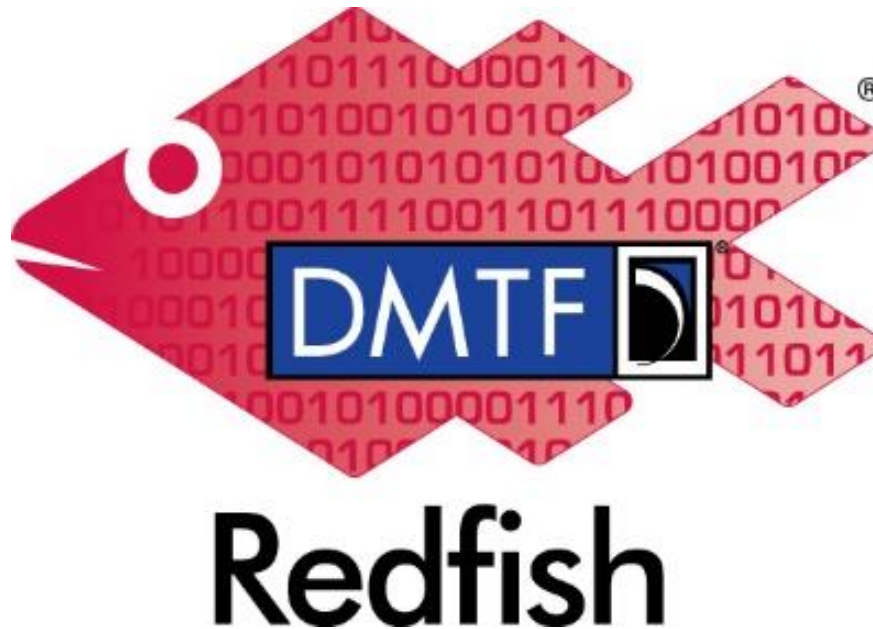

- 163 • Do not change the proportion or position of elements within the logo.
- 164 • Do not stretch the logo to "fit" into a particular space.
- 165 • Do not tilt, stretch rotate or alter the shape of the logo.
- 166 • Do not alter the approved color usage or palette.
- 167 • Do not reduce the logo to an unreadable size.
- 168 • Do not use the logo over a background that renders it unreadable.

169 If you require use of the logo on a dark background, email [press@dmf.org](mailto:press@dmf.org) for the approved logo files.

170 **4 Forum-specific logos**

171 **4.1 Redfish logo guidelines**

172

173

174

Figure 5 – Redfish color logo

175

176 **Color specifications**

177 DMTF forum logos:

Redfish logo:

178 PMS Blue 2738 C

Pantone 200C

179 It can be converted to:

180 C: 100, M: 87.06, Y: 0, K: 1.96

C: 0, M: 100, Y: 63, K: 12

181 or

182 R: 27, G: 66, B: 152

R: 211, G: 18, B: 69

183 **4.2 Redfish logo size requirements**

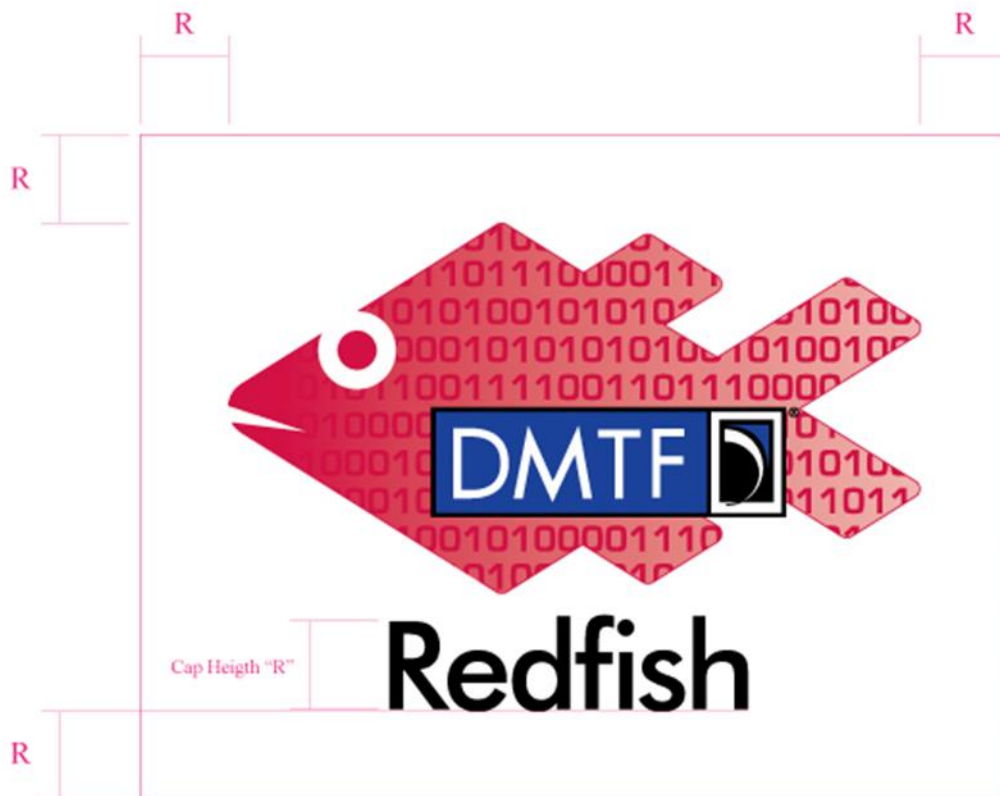

184 The Redfish logo is designed specifically for the Redfish Forum usage. In print uses, the primary logo  
 185 should be no smaller than 1 inch wide. For on-screen uses (web and video), the logo should be at least  
 186 100 pixels wide. The logo must only be used horizontally. Usage of the logo below these size ranges is  
 187 not permitted.

188 The digital logo file provided by DMTF may be scaled up or down to meet your design needs. There are  
 189 some parameters that must be maintained to ensure legibility and appropriateness. When reducing or  
 190 enlarging the digital file to suit your needs, the horizontal axis and vertical axis must remain in sync (i.e.,

191 scale both the horizontal and vertical amounts at 50%, do not make the horizontal scale 45% and the  
 192 vertical scale 52%); otherwise, the aspect of the ratio will be thrown off and the image will begin to skew  
 193 out of proportion.

#### 194 4.3 Minimum free space and measurement

195 The logo must have a “buffer” space around it to maintain legibility and visual impact. No other graphic  
 196 elements, such as typography, rules, pictures, etc., should infringe upon this space.

197

198 **Figure 6 – Redfish logo height and buffer space requirement**

199 The minimum free space needed is given relative to the height of the logo:

200 Where Redfish text height is (R), the required buffer space is also (R) in distance around the logo.  
 201 (i.e., if the (R) in Redfish is .5 inches tall, the space around the entire logo should be .5 inches)
